ANNUAL REPORT

OF THE

PARK AND RECREATION DEPARTMENT

FOR THE

YEAR ENDING JANUARY 31, 1920.

BOSTON, November 15, 1920.

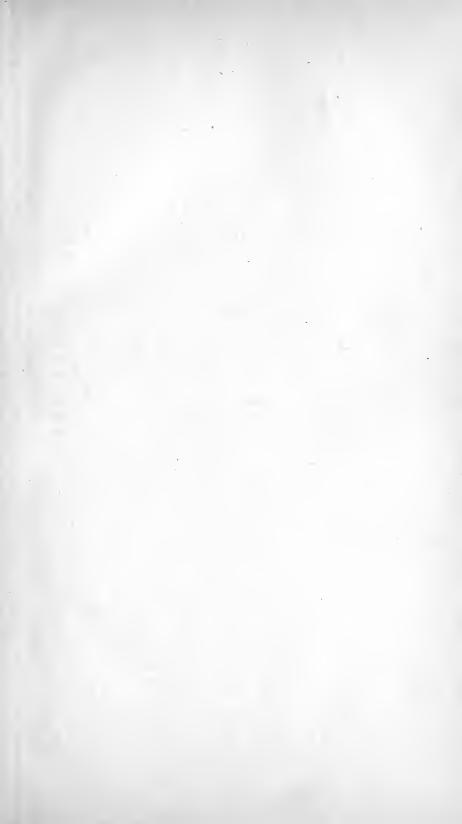

Hon. Andrew J. Peters, Mayor of Boston:

DEAR SIR,— The Park and Recreation Commission herewith submit the annual report for the year ending January 31, 1920.

The important problem confronting the department at the beginning of the year was the restoration of the Common to conditions that existed in the pre-war period. It was found impossible to complete such restoration because the temporary building used for war service activities could not be removed without curtailing the usefulness of those organizations interested in the welfare of returned soldiers and sailors. Therefore, the work of beautifying the Common was delayed until the spring of 1920. The Board feels, however, that it is now committed to the material and artistic improvement of the Common, having special reference to permanent walks, better playground facilities, and better upkeep of trees and lawns.

The vote of the citizens at the election of 1919 approving of the proposed changes on Tremont and Boylston

the northwesterly side of Monument Hill, where it would not interfere with pedestrians.

PUBLIC GARDEN.

The arrangement of the flower beds was entirely changed during the present year, many of the smaller beds and those poorly placed under the shade of the trees being removed. The walks were regraded and treated to a coat of red gravel, the turf improved by sodding and reseeding, and flowering trees and shrubs were planted to fill the gaps caused by the removal of the large poplars during the previous years. A large number of old cotton woods, which, on account of their immense size, were destroying other more valuable trees, were removed.

The main walk on the Public Garden was planted with tulip bulbs this fall, over 40,000 bulbs being used. During the war no bulbs were planted.

The Boylston street mall was reconstructed, the entrances were changed and shrubbery planted along the borders to act as a hedge and to remove the bare appearance of the Garden on the Boylston street side. The shelters were replanted with large shrubs transplanted from Franklin Park and our nurseries. Weeping willows were planted on the island and at intervals on the shores of the pond.

Commonwealth Avenue.

The lawns, between Arlington street and Charlesgate West, were all turned over, reloamed and reseeded, much of this work being on account of the destruction caused by the stands built for the Y. D. parade and the rest by the settlement of the ground after the loaming operations carried on several years ago. It was necessary to use over 1,000 yards of loam to insure the proper grade.

The turf has been greatly damaged in former years by the dumping of snow from the avenue being mixed with salt used by the residents for thawing the icy sidewalks. This practice of dumping was discontinued this year, thereby saving the department a considerable sum for restoration.

FENS.

Grading, planting and rearrangement of walks and drives near the Forsyth Dental Infirmary and the Huntington avenue entrance was completed. The Tremont entrance was resurfaced and also the drive near the Gardner Museum. The trees and shrubs opposite the Forsyth Dental Infirmary were thinned out very severely, and while the improvement is very noticeable, it is quite apparent that there are too many young trees planted opposite this building and also opposite the Art Museum. Further thinning should be done until the proper effect is obtained.

The Robert Burns statue was located on the shore of the Fens basin opposite the Westland avenue entrance. This location was selected after many attempts had been made to provide a suitable site. It is considered by everyone to be an ideal location. A walk was built in the center of the grove and permanent seats located at the Tremont entrance near the Normal School.

A large amount of material has been received from the Transit Commission for the north meadow. The placing of this filling in the Fens not only reduced the cost of work of the construction of the Arlington street subway station, but is very much needed in order to improve that meadow. The depth of the filling placed there some years ago was insufficient to give a proper grade, there being ugly looking slopes all along Boylston street.

Audubon road was resurfaced. Both bridges over the Boston & Albany Railroad were relaid with planking.

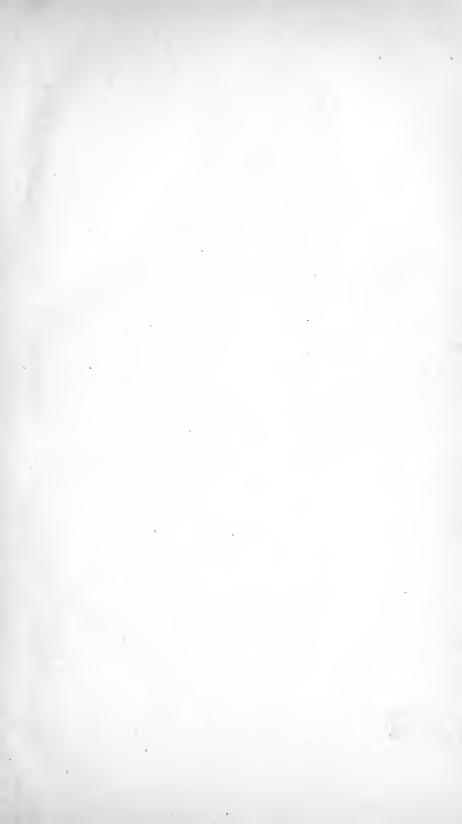

RIVERWAY.

Red oaks were planted in the loam space between the Fens and Olmsted Park. Considerable thinning was done on the trees and shrubs along the shores of the Riverway and this same treatment was carried on through Olmsted Park, particularly around the shores of Jamaica Pond where the good effects are very apparent. The thinning out of all undesirable shrubs was carried on through the Riverway to Franklin Park. A large number of vistas were opened up through the Riverway.

ARNOLD ARBORETUM.

Considerable resurfacing of the roads in the vicinity of the turntable and Peters' Hill was done; walks were repaired and resurfaced during the season; gates were painted and the old wall at the South street entrance to the Arboretum rebuilt and set in cement.

at Rogers Park was finished and opened to the public early in the year. The playground was levelled at Allston Park and partially enclosed with a wire fence to protect the neighboring properties from danger and damage caused by ball playing. This playground was graded so that skating could be enjoyed. A water and sewerage system has also been installed. When completed, this playground will be suitable for baseball and lawn tennis.

CHARLESTOWN.

A contract was let for the extension of the field house at Charlestown Playground; bleachers were built along the baseball diamond and the baseball ground was regraded and leveled. Studies have been prepared for a children's corner and mothers' rest.

On Mystic Playground the shelter was built for children, with children's apparatus, and the fence carried along the sea wall, thus protecting the children from baseball games and enlarging the baseball diamond, making it suitable for games for men and grown boys. Planting was carried along by the sea wall and extra benches established for women and children.

A contract was made and completed for the improvement and beautifying of Winthrop square. The monument was surrounded by an iron fence and the grass plots — used as a children's playground to the great detriment of the turf — were so enclosed as to prevent such damage in the future. The old brick sidewalk enclosing the square was replaced by granolithic.

North End.

The men's building, destroyed by the molasses tank disaster, was rebuilt and opened for the bathing season on June 15. The wire fences were also rebuilt and the ball field partly resurfaced.

South Boston.

The old bleachers at the M Street Playground were torn down and new bleachers built; the wire fence surrounding the children's corner was removed, thereby enlarging the baseball area.

The bath houses connected with the Head House, destroyed by fire early in the year, were rebuilt in time for the bathing season. A second fire, after the bathing season was over, burned the rest of the bathing houses and also the approach to the iron pier. These several fires rendered it imperative that the bath houses and the approach to the pier be made of fireproof construction as numerous small fires are put out every year.

The old shrubs along the grass plot on the Strandway were removed to the great improvement of that portion of the park.

The work of replanking and repairing Marine Park pier was completed during the year. The electric lights installed are a great improvement over the old gas lamps. The balustrade around Pleasure bay was repaired and improved, and the electric lights arranged for years ago were installed on the entrance posts.

Fort Independence, on Castle Island, seriously damaged by vandals during its occupancy by the United States troops, was repaired and placed in proper condition for visitors. A large number of permanent seats were placed around the lawns outside the fort, and a new fence placed for safety around the sea walls.

The drive from Farragut road to the end of the Strandway, near Pleasure bay, was resurfaced, and a very fine flagpole was placed in the park opposite the Head House to replace the one blown down a year ago.

The slopes of the beach inside the walk along the Strandway were loamed and seeded and the whole place presents a vastly improved appearance.

Granolithic walks were laid over the Strandway bridge across the Old Colony Railroad. New baseball diamonds were laid out on that portion of the Strandway, loamed and surfaced under the direction of the Public Works Department.

EAST BOSTON.

A contract has been let for the improvement of Mothers' Rest at Saratoga street, which is about 85 per cent completed. This includes the surfacing of the playground, the erection of walls surrounding the playground and the erection of a shelter with children's apparatus, also the planting of shade trees.

Neptune road, leading to Wood Island, has been planted with English elms, seventy-one new trees being placed there.

Cottage Street Playground was resurfaced and the baseball grounds improved; drinking fountains were installed at Orient Heights and at Cottage street. All

GYMNASIA.

Our activities in the gymnasia were seriously interfered with on account of the various buildings being occupied by the government troops and the State Guard, also the closing of the buildings on account of the coal shortage. A considerable number of repairs had to be done on the buildings and the apparatus.

At the present time we have eleven gymnasiums situated in Charlestown, East Boston, South Boston, Dorchester, Roxbury, West Roxbury and Roslindale, with instructors who hold classes for men, women and children at different hours of the day and evening.

Cabot Street Gymnasium was thoroughly renovated and a new filtering system was installed for the pool and the building is now in excellent condition.

A great many activities were carried on during the summer and winter season. The tennis tournament in Franklin Field was very successful, there being over four hundred competitors; the prizes were donated by the department.

The swimming races held at Charles River Basin and at the various beaches were very successful. Bowling tournaments were held during the summer season in Franklin Field, the greens being in perfect condition for the first time in a number of years.

A skating carnival was held at Jamaica pond on January 6; over 50,000 people participated. Skating facilities were provided at thirty-two places in the department. About three weeks of excellent skating was enjoyed during the later part of December and the first week in January.

On Boston Common, a large Christmas tree, standing over seventy feet high, was built by the department force. On Morton Street Playground a large number of Christmas trees were used around the pergolas and a Madonna was erected, donated by the Red Stocking Community Club for the Christmas festivities.

BAND CONCERTS.

Eighty band concerts were held last summer at the following places: Boston Common, Marine Park, Franklin Park and Jamaica Pond. An innovation of noon concerts was held on Boston Common which was very well patronized.

ZOOLOGICAL GARDEN AND AQUARIUM.

A building was erected in the ranges for the protection of the deer and other animals which are unable to stand the winter climate here, and several other inclosures have been made for the use of these animals in the summer. Through the failure of the mills to supply the wire netting for the completion of this work, the same has been delayed until next spring.

A number of changes were made at the Round House, where the lions and monkeys are kept, which contributed to the better housing of these animals. A number of birds were purchased by the curator from New York dealers, also some animals, including a number of varieties of deer.

The walks of the Greeting were completed from the Blue Hill avenue entrance to the elephant house. This should be a great improvement next year, so as to prevent thousands of visitors from roaming over the grass areas. Permanent seats have been located along the entrances to the Greeting to Blue Hill avenue. These seats are not only useful for resting purposes, but will form a barrier to prevent the making of trails used for short cuts, which very much disfigure the appearance of the park.

AQUARIUM.

A large number of new fish was purchased by the curator and installed in the Aquarium. A contract has been let for a new chimney,— the smoke-stack on the old chimney had disintegrated. The basement has been entirely repainted in white, and a new partition built between engine and boiler room to replace the one torn down.

A detailed report of the Aquarium and the Zoo is herewith appended.

Respectfully submitted,

WILLIAM P. LONG, Deputy Commissioner.

Vegetable Garden.

Aside from the great saving and convenience of a constantly accessible supply of vegetables, the freshness of the daily distribution from the garden and storehouse renders them more appetizing and better in every way for the birds and mammals.

Last spring a two-acre plot of land was planned for the purpose of supplying the Zoological Garden with vegetables. On account of unfavorable weather and lateness in planting the returns did not much more than pay for costs. This year I intend to make the garden a decided success.

Repairs and Improvements.

The round house, which has been the "temporary quarters" for the lions and monkeys for some years, has been almost completely remodeled inside. The monkey cages have been shortened to prevent the teasing and cruel acts, oftened practiced on these animals by the public. The old cages were also subdivided in order to allow for the exhibition of more animals, and a 6-foot guard fence has been erected before all cages which will prevent much of the disastrous feeding which has been experienced in the past.

The heating system has been changed, from radiators underneath the cage floors to steam coils in front, which will equalize the temperature and do away with the draughts which have caused much sickness and many deaths among the inmates in the past.

The outside cages on the northwesterly side were subdivided and fitted with safety entrances, and skylights were cut in the roof to let the sun into the hitherto dark interiors. Here the monkeys were kept throughout the summer and well into the fall, the first time since their reception that the members of the primates had been able to breathe the open air and bask in the unhampered rays of the sun. The result was indeed gratifying, not a sneeze or a cough since they were put outside and members that appeared to be on the "downward path" took a "new lease of life."

One third of the elephant house and exercising yard has been fenced off with heavy steel bars and rails, to provide a place for two giraffes which are expected late this spring.

Shelves and cages have been installed in one of the small rooms at the bird house. There all sickly or otherwise indisposed birds may be placed for observation. It will also serve as a quarantine room where all new arrivals may be held until such time as it is deemed safe to admit them to the exhibition cages.

The cement work about the pools at the bear dens which was considerably cracked and in many places completely broken away has been repaired.

The bottom of the iron framework of both the inside and outside cages at the bird house have been cemented to keep them from rusting. The outside cages have also been given a coat of paint.

The water and drainage system at the range has been extended and improved, and eventually will obviate the present necessity of carrying to each yard.

Small and neat metal frames with a glass front have been placed on the front of every cage at the bird house. Printed cards in these holders give the English and scientific name of the bird with a synopsis of its range, habits and food. The advantage of these new signs over the old ones, which were placed at the top of the cages, are very apparent, in that they are directly before one's eyes, easily read, and of educational value.

A recuperating station, consisting of two roomy cages, was established in one of the yards at the range. Here, small mammals, worn out by public attention, or suffering from any disorder, could be placed in the open air and sunlight, away from annoyance of any sort.

Losses of Mammals.

If our losses had been confined to disease or natural causes, they would take up very little space, but when augmented by the violent deaths from outside causes, they look more pretentious.

No.	Name.	Cause.
1	Virginia door	Killed by dogs.
1	Virginia deer Fallow deer fawn	Killed by dogs.
$\frac{1}{2}$	Raccoons.	Killed by vandals.
ī	Raccoon	Killed by dogs.
1		Killed by vandals.
Î	Kangaroo.	Killed by vandals.
1	Virginia deer	Rickets.
2	Lion cubs	Colonitis.
1	Rhesus monkey	Paralysis.
1	Mona monkey	Appendicitis.
1	Yellow baboon	Rupture of intestines.
1	Capuchin monkey	Osteo malacia.
1	Marmoset	Rheumatism.
2	Foxes	Fighting.

Losses of Birds.

During the past year we have lost eighty-eight birds. When the facts are taken into consideration that the average life of a bird in captivity is much less than in its natural haunts, that but few new specimens have been added during the last three years, that two thirds of these birds were brought to us as gifts and in many cases were suffering from some injury, sickly, refused to eat, or could not become acclimated, this mortality is not alarming.

Important Acquisitions.

Last spring, two female buffaloes were purchased from the Corbin Park at Newport, N. H., for the very small price of \$100 each. Our male of this species is one of the finest in captivity and has never had a mate.

Two robust kangaroos were obtained from the Cincinnati Zoo in trade for one of our brown bears which could not get along with its cage mates. It is the first time kangaroos have been exhibited here.

A new species at the Zoo are three Japanese Sika deer, one buck and two does, bought from the Philadelphia Zoo.

One female red deer was also purchased from the Philadelphia Zoo to mate with our fine buck.

The most important acquisitions of birds were: One toucan, two scarlet ibis, four white-crested jay thrushes, two white-throated jay-thrushes, one egret, and two razor-billed curassows.

The following mammals were reared at the Zoo during 1919: One axis deer, one lion cub, one llama and six Eskimo dogs.

CENSUS.

Birds.—Species, 157; specimens, 424. Mammals.—Species, 41; specimens, 110.

Showing an increase over 1918 of 36 species and 58 specimens of birds; 8 species; 20 specimens of mammals.

AQUARIUM.

The year 1919 has been an uneventful one in the history of the Aquarium, but it may be stated as continuing to successfully fulfill its mission as one of Boston's most important museums. No shipments of southern fishes were received during the year, and as the average life of many of those fishes is but a few months in captivity, it can readily be seen that our collections must be sadly depleted. Most of the groups of fishes now to be seen in our exhibition tanks are the hardy survivors of larger groups from which the weak, injured, or short lived specimens have gradually been eliminated.

The sincere commendation received not only from officials of other aquariums but from the general public in regard to the appearance and general upkeep of our institution has been most gratifying.

Acquisitions.

Several gifts of local game fishes have been gratefully received from the Massachusetts Fish and Game Commission.

Dr. Heber Bishop of Boston, after much trouble and labor in catching and transporting, donated a wonderful specimen of the landlocked salmon. This fish weighed 18 pounds and was taken at Doctor Bishop's camp at Clearwater lake, Farmington, Maine.

Two baby harp seals, which had evidently drifted out of their native haunts in northern waters and cast ashore on Cape Cod, were added to our seal pool. It is a very trying and seldom successful task to rear these creatures, but nevertheless with much care one was kept for six months, only to die as the result of being fed a handful of elastic rubber bands, small stones and paper by the public.

Sea Lions.

The physiological effect upon visitors of the intense and continuous "barking" of the sea lions has been thoroughly studied, and as a result it would seem that they should be removed. Much of the public's enjoyment in observing the different collections is spoiled, and instead of pleasurably lingering before the tanks many visitors rush through the Aquarium as fast as possible in order to get away from the discordant and echoing clamor of these animals.

One sea lion was born last spring, and, contrary to the opinion of eminent zoologists, has been successfully reared. The mother of this baby died the latter part of the year as the result of intestinal worms, a common trouble in this species.

Needs for 1920.

In addition to the necessity of more fish for exhibition purposes, there are many expensive repairs to be made during the coming year.

The iron chimney has rusted away with the result that with a southwest gale the building is filled with smoke and gases. An entire new chimney is needed.

The fresh water filters have not been cleaned and renovated for several years, and the water in the exhibition tanks is already beginning to have a rusty tinge. The work of renovating these filters, of which there are four, will cost approximately \$800 each, but if we are to keep our fresh water collections it must be done.

The corrosion of pipes in the salt water system is quick and constant and a general overhauling and renewal of that system must be done.

Among the salt water fishes of this locality are many fine and interesting specimens of which little is known by the general public. These fish form a plentiful and easily accessible supply which, if we had a cold salt water installation, would be of vast educational value. The Aquarium was originally intended to contain such an installation in a north wing, which was never constructed, but which could be easily added at such time as the money for that purpose is forthcoming.

Respectfully submitted,

G. F. MORSE, JR., Curator.

REPORT OF COMMITTEE ON BAND CONCERTS.

Boston, November 24, 1919.

To His Honor the Mayor of Boston:

In behalf of the committee appointed by your Honor to make recommendations regarding the public band concerts during the summer of 1919, I beg herewith to tender our report.

Before determining the schedule of concerts for the season, your committee gave much thought to the question of the best means to assure the highest possible standard of repertoire and performance in all concerts; having no less in mind the purpose of the latter as a means of entertainment and recreation to the citizens of Boston.

At the outset it was realized that under existing conditions there is little incentive to any one of the numerous civilian bands to maintain a permanent organization, unchanging in personnel and having the advantage of regular and efficient rehearsals as an organization, under a single leader. It would obviously be impossible for - the committee to undertake to provide the additional remuneration required by the bands in nearly all cases for holding any rehearsal whatever; for the cost of a single rehearsal for any concert is 40 per cent in addition to the price for the concert itself; payment of which additional sum would necessarily involve curtailment of the total number of concerts given by nearly 30 per cent. In view of this fact, the plan unanimously favored by the committee provided for the establishment of what would virtually be a municipal band, under competent leadership, and composed of the most able musicians available. To attract such musicians during the summer months, it would be necessary to offer a contract covering not less than five concerts weekly, for a period of at least eight weeks.

To establish such an organization exclusively for the city concerts, and to maintain the usual additional schedule of Sunday concerts, would require even a larger appropriation than that generously placed at the disposal of the committee by your Honor for the current year. It was accordingly decided, with your Honor's approval, to invite the co-operation of the Metropolitan Park Commission in carrying out a plan whereby a certain number of the concerts might be taken over by that body as a part of its annual Metropolitan Park concert schedule. The chairman of this committee appeared before the Metropolitan Park Commission, and the plan as submitted was courteously received and taken under consideration. Some time later, however, and after a second interview with the secretary and one of the members of the commission, the latter announced its inability to adopt the plan as suggested. It felt that the plan suggested had its possibilities, but could not be carried out this year.

The committee thereupon proceeded to define the schedule of concerts for the season. It was thought best to adhere to the policy established last year of giving no week-day concerts in various outlying districts of the city, but to have all concerts on Sunday afternoons at: Boston Common, Marine Park, Franklin Park, Jamaica Pond and Wood Island Park. It was also decided, with your Honor's approval, to take advantage of special rates offered for a series of twelve concerts given in a single location, on six successive days; and a special season of four weeks was thus made possible, to be given on alternate weeks on Boston Common and at Marine Park, beginning July 15. This plan offered the best practical substitute for that of a fixed organization regularly rehearsed, since by continuous association it was certain that the standards of performance would be raised.

A schedule of the concerts as given is annexed. One concert each at Marine Park, Franklin Park and Jamaica Pond was offered to the Overseas Naval Band, conducted by Mr. Alfred Moore, but traveling engagements of the organization prevented their acceptance. These concerts were then allotted to other bands as noted in the schedule.

For the Sunday afternoon concerts on Boston Common the band comprised forty men, including the conductor; for all other concerts, including those of the special season, twenty-six men, including the conductor. The character of the programs was invariably of a gratifyingly high standard, and the large audience which gathered to enjoy the concerts gave every evidence of their appreciation of this very quality. Your committee is firmly of the belief that the public at large welcomes the best music, and has no desire to be regaled with the deplorably mediocre compositions which too often pose as examples of "popular music," or "what people like."

The special season above referred to merits special mention. Beginning Tuesday, July 15, concerts were given twice daily on Boston Common until the following Sunday, inclusive. The prevailing strike upon the Boston Elevated Railway not having been settled before the end of the week, it was thought best to continue the concerts on Boston Common during the following week, instead of giving them at Marine Park as originally contemplated. After the settlement of the transportation strike, probably because of the increased fares, it was found that the number of people visiting Marine Park was materially smaller, and in view of the pronounced success of the concerts on Boston Common, it was decided to continue them there throughout the four weeks of the special season.

These concerts were given twice daily, except Mondays, at noon and at 8 p. m. The noon hour offered to a large number of people opportunity for recreation and enjoyment of music during the noon period, and the daily attendance and evident enjoyment by the audience of the privilege were both most gratifying. The evening concerts were also exceedingly well attended, and the committee feels that the experiment of such a season has proven its distinct value, not only as a means of pleasure and recreation to the community, but also as a factor in the maintenance of high musical standards.

Special features were the (Sunday) programs of French and Italian music, and notably the last concert of the special week-day season on August 9, designated as "Soldiers' night." In the words of the secretary of your committee:

"The last of the week-day concerts on the Common was arranged especially for service men and the attendance of soldiers and sailors and their friends made the audience an unusually large one. The band conductor was assisted by a song-leader, Mr. Stetson Humphrey, who directed the audience in the rendering of familiar numbers. Their response was so enthusiastic and the whole affair so enjoyable that the committee recommend a further development of the feature of community singing, carefully controlled, as well as of other forms of vocal music, in connection with these concerts." The committee respectfully suggests for consideration before the next season:

1. The plans submitted by Mr. Shurtleff, at the request of the chairman of the Park and Recreation Commission, for additional permanent seats about the Parkman Bandstand, together with the provision of additional trees, looking toward the future achievement of more shade.

2. The question of additional seating accommodations at Marine Park.

3. An effort for further consultation with the Metropolitan Park Commission regarding co-operation in concert schedules.

4. The possibility of extension of the season of daily concerts on Boston Common to a total of six or eight weeks.

5. The installation of an adequate system of permanent electric lighting on the Parkman Bandstand.

The committee has had the valuable library of band music formerly used by the Municipal Band, and more recently stored in the rooms of the Park and Recreation Commission, carefully catalogued and made available for use.

A financial statement, showing all bills paid and an unexpended balance of \$133.33 from the appropriation allotted by your Honor, is appended herewith.

The committee desires to place on record its appreciation of your Honor's generous interest and co-operation in its recommendations; of the courtesy and assistance at all times of the chairman of the Park and Recreation Department and his associates, and of the co-operation of the daily Press in the publication of programs and announcement of concerts.

The committee also desires to record its appreciation of the valued service of Mr. Harry R. Wellman as one of its members, who was obliged to resign his membership by reason of his removal from the state.

Respectfully submitted,

WALLACE GOODRICH, Chairman. DR. A. T. DAVISON. MALCOLM LANG. CHARLES K. NORTH. JOHN A. O'SHEA. WILLIAM A. LEAHY, Secretary.
